

**Social enterprise courses, modules, programme in Estonia, Finland and Lithuania
“Education for smart development of social entrepreneurship” funded by the Nordplus Horizontal
programme (Project No. NPHZ-2017/10198)**

ESTONIA

Currently, the Ministry of Education and Science leads the entrepreneurship programme Edu&Tegu (2016-2020), which aims to promote and enhance an entrepreneurial mindset and entrepreneurship in schools at all levels. It has created an entrepreneurship education programme for vocational schools and universities. One of its modules specifically addresses social entrepreneurship.

The programme is being piloted in Estonian higher education institutions within existing courses or separately created courses from 2017 to 2020.
